

Wall Graphic Media

True Repositionable Microsphere Adhesive

Make a bold impression and grab your audience's attention by changing that unused wall space from an afterthought into a focal point.

Unlike other temporary wall graphic solutions, Plastiprint's Wall Graphic Media was designed to hide unwanted surface textures due to its semi rigid nature. Its high quality construction offers excellent print quality and superior lay-flat properties. The custom removable and repositionable adhesive adheres to interior walls or glass surfaces and removes without leaving any residue.
