

PolySyn

Mineral-Reinforced Removable Adhesive

PolySyn is a mineral-reinforced, polyolefin-based synthetic media and is an environmentally friendly alternative to vinyl. Being mineral reinforced means that there is a reduction in the polyolefin material being used to make the final product. PolySyn is a great media for applications which require durability, strength, ease of installation and superior print quality.

The repositionable adhesive makes installation quick and easy without damaging the surface. The result is a durable film with a soft peel that has increased outdoor and UV exposure performance. It can be applied, removed and re-applied.

Description

- ▶ 3.2mil White
- ▶ Repositionable Microsphere Adhesive
- ▶ 92# Paper Liner
- ▶ Size: 54" Wide Stock
- ▶ Shelf Life (@ 73°F, 50% RH) - 1 year

Applications

- ▶ Promotional Advertising & P.O.P. Signage
- ▶ Wall Graphics
- ▶ Decals & Labels
- ▶ Interior Decorative Graphics
