

**PolySyn Removable Adhesive Media**

**PolySyn** is a mineral-reinforced, polyolefin-based synthetic paper media. PolySyn is an excellent alternative to vinyl and is ideal for a variety of pressure sensitive applications. PolySyn is a great media for applications which require durability, strength, ease of installation and superior print quality. PolySyn is a degradable media.

The repositionable adhesive makes installation quick and easy without damaging the surface. The result is a durable film with a soft peel that has increased outdoor and UV exposure performance. It can be applied, removed and re-applied.
