

PVC-Free Cling Film

Easy Installation & Reusability

PVC-Free Cling Film is designed as a vinyl free cling film for advertising graphics, P.O.P. window signage, decals, labels and seasonal graphics.

PVC-Free Cling Film is also used as a high-quality protective film. It's ideal for electronic device protection as well as a protective film for thermo-forming processes and many different manufacturing processes. It can be applied to a multitude of glossy surfaces.

The copolymer cling formula (**micro-suction cling technology**) makes installation quick and easy without damaging the surface. It can be applied, removed and re-applied multiple times and has a stronger cling bond than static cling vinyl. The result is a durable film with a soft peel that mimics static cling vinyl without the environmental and processing concerns.

Description

- ▶ 2mil & 4mil Optically Clear, 3.5mil Frosted Clear & 3.5mil White Polyester
- ▶ 2mil White & 2.6mil Clear Polypropylene Version on 90# Paper Liner
- ▶ Micro-Suction Cling Technology (Co-Polymer Cling Coating)
- ▶ 54" Wide Roll Stock – We can roll slit & sheet to different sizes

Features

- ▶ Free of Plasticizers, Formaldehydes and harsh chemicals
- ▶ Micro-Suction Cling is Washable ensuring optimal reusability / Wet Apply
- ▶ Water Resistant / Fade Resistant
- ▶ Conforms to temperature change (does not shrink or expand)
- ▶ Resistant to High Heat. Protective Film for Thermoforming applications
- ▶ 1 Year Printable Shelf Life
